1. About the NRI-NA Brand

What Defines Our Brand — and Why Guidelines Matter

What is a Brand?

A brand is an unshakeable commitment to provide an experience that is characteristic of the brand, and an assurance of unwavering quality. Projecting a consistent image is considered essential for a strong brand.

Purpose of the Brand Guidelines

These guidelines explain the principles and rules that must be understood to vividly represent the unique NRI Group customer experience at every point where we interact with clients and the wider world. Please understand and apply these guidelines correctly to establish an appealing brand image that resonates with clients.

Design Direction Keywords

Drawn from the brand concept and NRI Group identity, these keywords describe the design direction and form the foundation of the usage rules.

Keywords Drawn from the Mission, Vision, and Values

Passion
Pride
Energy

Design Direction Keywords

Convey a sense of human-centered value creation, building an emotional connection with recipients.

Prosperity
Safety
Security

Leave recipients with an impression of vigor, avoiding excessive explanation or exaggerated expression.
Convey a sense of being at the leading edge of the times.

Foresight
Challenge
Precision

Provide recipients with confidence and peace of mind by conveying a sense of commitment to the substantial. This may include certain kinds of humor.

Messaging

Universal Value Proposition (UVP):

We help clients achieve adaptive innovation by turning complex technology challenges into quality business outcomes — powered by insight and accelerated by AI.

Messaging Pillars:

1

Expertise

- Top 1% Microsoft and Cisco partner
- Verticalized best practices

2

AI-First

- Easy-to-consume AI services
- Real-world AI in production

3

Quality

- Outcomes assured by NRI quality system
- Clients recommend us: NPS > 40

4

Agility

- Framework agreements
- LEAN principles
- Global backing with adaptive execution

2. Logo Usage

Primary Logo

NRI's primary logomark is our most recognizable brand element. The logotype is the company acronym in uppercase. Because our logomark is so tied to our identity, we need to apply it consistently across all channels. Please don't modify or recreate it in any way. This will help us continue to build brand recognition and equity.

The image shows the NRI logotype in a bold, blue, sans-serif font. The letters are thick and blocky, with a slight shadow or depth to the characters. The 'N' and 'R' are connected, and the 'I' is a simple vertical bar.

Clear Space

Clear space is the negative space maintained around the logo, allowing it to breathe. To maintain our logo's integrity and ensure visibility, clear space must be free from graphics, text, or other logos and general clutter. The clear space around our primary logo is defined as 0.5 the height of "N" in NRI. This is represented as "x."

Minimum Size

To ensure legibility across all channels, our primary logo should never appear smaller than 0.75" wide in print and 75 px wide on screen. When smaller logo applications are necessary, use the logo badge, which can appear as small as 0.3" wide in print and 30px wide on screen.

Print

Digital

Color Variations

The NRI logo is designed to be shown in only single-color format. Always ensure sufficient contrast to display the logo clearly.

Color

White

Black

Logo Don'ts

1. Don't distort, stretch, or skew logo proportions by changing the ratio.
2. Don't rotate the logomark.
3. Don't use unapproved colors for
4. Don't add effects to the logomark.
5. Don't use the logomark in a sentence, phrase, or title.

NRI is future
focused

Co-Branded Lockups

In some instances, it may be appropriate to lock up the NRI logomark or logotype with a partner logo or partner name (e.g., co-branded PowerPoints or third-party partnerships). When using a partner logo, it should be spaced from the NRI logomark by a distance equal to the height of the “N” in NRI, represented as “x.”

When the partner name is typeset instead of a logo, it must follow these formatting rules:

- Set the partner name in Arial Regular with tracking set to 0
- The type size must equal the x-height of the NRI logomark
- The spacing between the NRI logo and the partner name must also equal the x-height.

Important Note:

Our key partners may update or modify their co-branding requirements. To ensure compliance, always reference and align with the latest guidelines available on their brand portals.

3. Color Application

Color Palette

Primarily use the blue support colors, supplementing with other colors as needed.

The color palette has been designed to enable bold, sophisticated arrangements that leave a colorful impression even when using only shades of blue. This communicates taking on challenges, cutting-edge, digital, and diversity.

Color Balance

The image to the right suggests the balance of colors to be used in two-dimensional graphics.

Non-blue support colors should be used as accents to facilitate readability.

Gradient Usage

Gradients are used to extend the NRI color palette into more dynamic, digital-forward expressions. They should reinforce the brand's sense of innovation, depth, and forward momentum while maintaining clarity and consistency.

How to Use Gradients

Gradients should be constructed primarily from the NRI blue palette, transitioning between approved tones to create a sense of movement and dimension. Subtle variations in shade and opacity can be used to enhance visual interest without overpowering content.

- Use gradients as **background elements**, not as primary content containers
- Maintain **smooth, clean transitions between colors**, avoiding harsh or abrupt shifts
- Keep contrast high to **ensure text remains legible**
- Pair gradients with **simple geometric forms** to reinforce structure and clarity
- Use darker tones to anchor layouts and lighter tones to suggest motion or progression

Visual Intent

The use of gradients should convey:

- Digital progression and innovation
- Energy and forward momentum
- A sense of depth and sophistication

Gradient Specs

- Linear Gradient at 0, 45, 90 degree angles
- Can be tinted over photos and textures at degrees of 10% intervals

4. Typography

Primary Typeface

Yu Gothic Is Used for Headlines

Yu Gothic is the primary typeface, used for headlines, subheadlines, title tags, body copy, and buttons.

Yu Gothic is a standard sans serif type family designed to be highly readable for setting a large volume of text. Its character size is designed relatively small and has comfortable letter space between each letter that individual character stands out and is able to maintain legibility in typesetting. Yu Gothic consists of seven weights and is versatile to be used from footnotes or main body to subhead and headlines.

Headlines:

Regular or Bold

Subheadlines:

Medium, Semi-Bold, or Bold

Body:

Regular

Buttons

Medium or Semi-Bold

Arial Is Used for Headlines

Arial is the supporting typeface, best used for internal and client-facing documents that require broad compatibility and clear readability across platforms.

Arial is a widely supported sans serif typeface designed for clarity and consistency across digital and print formats. Its balanced proportions and simple letterforms make it highly readable at multiple sizes, ensuring strong legibility in both presentations and documents. Arial includes multiple weights and can be used effectively across headlines, subheadings, body text, and UI elements.

5. Photography

Photography: Digital, Financial, Global

Digital

- Scenes of digitally evolving new experiences
- Expressions of speed
- Expressions suggesting foresight and hope for the future
- Eyes that suggest passion or a strong sense of purpose

Financial

- Expressions that recall growth or development
- Cutting-edge expressions that indicate a capability for innovation
- Expressions that suggest sincerity and reliability
- Intelligent expressions conveying the foresight to create new value

Global

- Expressions that suggest light (bright sources of light) and energy
- Expressions that suggests connection
- Dramatic compositions with a sense of scale suggesting breadth

Photography: Environmental, Social, Governance

Environmental

- Expressions that suggest light (bright sources of light) and energy
- Scenes of harmony between people and nature
- Scenes of smart living
- Dynamic compositions that suggest breadth

Social

- Lively, fresh facial expressions
- Expressions that suggest action and openness
- Eyes filled with curiosity
- Realistic “slice-of-life” expressions

Governance

- Sincere, open facial expressions
- Disciplined expressions with a sense of unity
- Images of cooperation and growing together

A1. NRI Group Vision 2030 Statement Logo

NRI Group Vision 2030 Statement

In an era of uncertainty, we envision a clear path toward unprecedented prosperity.

We lead the way with boldness and precision, realizing our customers' aspirations for a better society.

Creativity drives us to take on challenges, taking on challenges to growth, and growth to new possibilities. With every step forward, we open a greater tomorrow.

**Envision the value,
Empower the change**

**Envision the value,
Empower the change**

Display Colors

The logo is composed of two arcs with the NRI Group Vision 2030 statement in a bold, strong typeface.

The lower arc is NRI Blue, which represents creativity, while the upper arc is the red from the NRI color palette, which represents change.

The density of the NRI Blue used in the NRI Group Vision 2030 statement logo differs depending on whether the background is white or navy black.

Isolation Area and Minimum Size

The NRI Group Vision 2030 statement logo must maintain its identity when used. Therefore, an isolation area has been established to ensure it is surrounded by sufficient white space. In principle, do not display other elements within the isolation area

Isolation Area

Minimum Size

Positioning the NRI Group Logo and NRI Group Vision 2030 Statement Logo

Basic Form

In principle, the NRI Group Vision 2030 statement logo is displayed in combination with the NRI Group logo.

Combination Rules

Separate the NRI Group Vision 2030 statement logo from the NRI Group logo by at least twice the height or width of the NRI Group logo.

When displayed parallel to the NRI Group logo:

When displayed left-aligned with the NRI Group logo:

When displayed center-aligned with the NRI Group logo:

Display Proportions for the NRI Group Logo and NRI Group Vision 2030 Statement Logo

This page describes the display proportions for the NRI Group logo and the NRI Group Vision 2030 statement logo. Use proportions appropriate for your project.

Note: These are recommended values

Minimum: For general applications (printed matter and digital media generally)

Maximum: For brand campaigns (advertisements, novelties, etc.)

Layouts for the NRI Group Logo and NRI Group Vision 2030 Statement Logo

This page describes layouts for the NRI Group logo and the NRI Group Vision 2030 statement logo.

Basic Layout

Display the NRI Group logo at the upper left and the NRI Group Vision 2030 statement logo at the upper right, the lower right, or left-aligned at the lower left.

Layout Emphasizing the NRI Group Vision 2030 Statement Logo

Display the NRI Group logo at the top with the NRI Group Vision 2030 statement logo below it.

Layout Including a Product Logo

The number of logos on the same display surface is limited to three.
